To: Friends@loran.org
Subject: Thank you for your interest in Loran -

You received this e-mail because you expressed support for the future of the Loran positioning, navigation and timing system. This is a thank-you, and an invitation to become involved with the International Loran Association. Unless otherwise authorized, the use of your e-mail address is for this communication only and will remain secure with the International Loran Association. Promise.

To Federal Register respondents,

The International Loran Association (ILA) extends its appreciation and thanks for your response to the recent US Coast Guard request in the *Federal Register*. Your overwhelmingly (over 90%) positive expressions of support for continued operation of Loran and for the transformation to eLoran are a very significant factor in the decision on Loran's future. We are confident of a positive decision, soon.

To learn more about the system, its operation, applications, and its people, please come to the Association's 36th annual Convention and Technical Symposium in Orlando, FL USA, October 14-17, 2007. Participate as a listener or a speaker; respond to the Call for Papers if you are interested in addressing the group.

The ILA web page at www.loran.org has the information on the meeting and hotel accommodations. Just use the EVENTS button. Also take a look at the current ILA Newsletter at www.loran.org/ILAArchive

We look forward to involving you as we continue to modernize Loran and create eLoran!

Sincerely,
Langhorne M. Bond, President
International Loran Association
